

# California OES Weather Threat Briefing

Thursday, June 25, 2020  
9:00 AM PDT

- **Day 1 (Thursday):** Heat impacts are expected again across Inland CA. Increased fire weather concerns for southern and inland CA with continued hot and dry conditions. Isolated thunderstorms across northern CA and the Sierras may also lead to increased fire weather concerns. Heavy rain may produce flash flooding in Mono County on the east side of the Sierra.

Regional Operations Center  
Salt Lake City, UT*

# **WEATHER KEY POINTS**

**06/25/20 - 07/01/20**

## **Thursday - Saturday**

- A long duration heat wave continues across the state and is not expected to break until this weekend. The northern Sacramento Valley, from Redding to Chico looks to be particularly hot today and Friday with little to no relief overnight.
- Thunderstorms are possible over the Sierra again today, and over the southern Sierra on Friday, which could lead to new fire starts.
- Locally heavy rain is possible today in Mono County on the east side of the Sierra where a Flash Flood Watch is in effect.
- Most of the state will see continued dry conditions and breezy winds at times, which will lead to elevated fire weather concerns, with the strongest of these gusty winds expected in and around the Antelope Valley.

## **Sunday-Wednesday**

- Strong winds are likely across the interior portions of southern CA and the eastern Sierras for Sunday and Monday.
- Fire Weather Watches have been issued for these portions of the state for Sunday and Monday.
- Cooler temperatures can also be expected during these couple of days ahead of a slight warming trend by the middle of next week.
